

A group of companies specializing in impactful, high energy, shows, special effects, multi-media attractions, ride and ride equipment integration, and unique attractions; for theme parks, amusement parks, themed venues, and special events. Our team members are seasoned professionals, specialized all aspects of show and show equipment development, production, and fabrication.

EFEK Entertainment was established in 2020 to better serve the growing Southeast Asian Entertainment Industry. The company owners, managers and designers have worked in the entertainment industry for over 30 years, successfully completing many large scale projects around the world.

Our team of international experts include engineers, script writers, creative content developers, technical and artistic designers, specialized fabricators, show directors, riggers, entertainment consultants, audio and lighting developers, show system programmers, specialized project managers, multi-media developers, and more... We have a network of partner companies in the USA, Europe, China, Thailand, Indonesia, and Singapore...

Our special effects equipment is designed, engineered, fabricated, installed, and commissioned by our full-time team of engineers and technicians. In addition to our full show production services, we design, manufacture, install and commission our own special effects and mechanical equipment, an added value to our clients, as most show production companies sub-contract the purchase of the equipment.

Currently, our companies are operated by 11 full time team members, and we typically add specialized staff on project by project basis, which allows us to continually have the best suited talent for each specific project. Our offices and equipment fabrication facility is located in Jakarta, Indonesia.
